

Maukatherm T iQ⁺

PIR sandwich panel

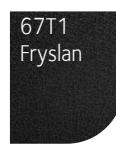

Standard colors

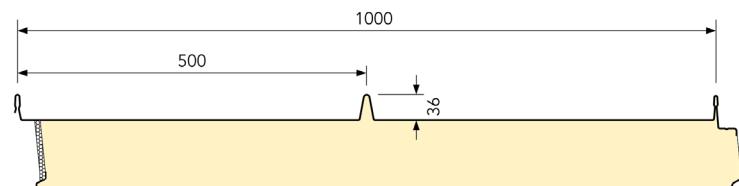

Hairexel® 60 R'Unik 45

Tectova® 60

Metallic color

EXTRA

Maukatherm T iQ⁺ is aesthetic and presents the advantage of a warm roof that is easy to install. Its installation requires 2.5 times less time than that of a conventional zinc standing seam roof.

Please note: as for zinc roofing, Maukatherm T iQ⁺ presents an unavoidable phenomenon of oil canning (warped appearance, scattered warping).

Panel characteristics

| | Panel nominal thickness (mm) | |
|----------------------------------|---|--------------------------------|
| | 70 | 100 |
| Dimensional | Thickness of the outer / inner facing (mm) | 0.60 / 0.50 |
| | Overall length (mm) | Minimum 3 000 / Maximum 12 000 |
| | End cuts (mm) | 50 - 100 - 200 - 300 |
| Aesthetic | Aspect of the outer facing | Standing seam |
| | Aspect of the inner facing | Ribbed |
| Weight (kg/m²) | | 12.65 13.84 |
| Reaction to fire | Euroclass acc. to NF EN 13501-1 | B-s1,d0 |
| Thermal | Thermal conductivity λ (W/m.K) | 0.019 |
| | Thermal transmittance Uc (W/m ² .K) | 0.273 0.189 |
| | Linear heat loss ψ (W/m.K) | 0.014 0.006 |
| | Surface loss coefficient Up (W/m ² .K) | 0.287 0.195 |
| | Thermal resistance R (m ² .K/W) | 3.523 5.151 |

Fixings

- 1 repartition plate and 1 screw on end support
- 1 repartition plate and 2 screws on intermediate support

Maukatherm T iQ⁺

PIR sandwich panel

Application table for nominal panel thickness of 70 mm

Admissible spans in meters for facings thickness **0.60 / 0.50 mm**.

Please note: For suction, the maximum load to be retained, fixings included, corresponds to the lowest value in the row.
Wind loads on panels and fixings are defined in our Climatic and seismic actions guide.

| | Panel alone Nominal thickness 70 mm | | Loads (daN/m ²) | Wind resistance of fixings | | | | | |
|----------|--|-------------------|--------------------------------|----------------------------|-------------------|-------------------|------------------------|--------------------------------|----------|
| | Single span | Multiple span | | Number of supports | | | | Loads (daN/m ²) | |
| | | | | 2 supports | 3 supports | 4 supports | 5 supports and more | | |
